

PN IM3032

Isotype Control

HAMSTER IgG

Form	Unconjugated	Clone	530.6
Quantity	100t	Isotype	IgG
Presentation	Liquid 1mL	Species	hamster
Purity	Purified IgG		

For Research Use Only. Not for use in diagnostic procedures.

**SPECIFICITY**

This hamster IgG has an irrelevant specificity. It induces nonspecific immunolabelling on hematopoietic cells and therefore constitutes an isotype control.

**BUFFER**

This antibody is supplied in liquid form, containing 0.1% sodium azide.

**STORAGE CONDITIONS AND STABILITY**

Each reagent is stable up to the expiration date when stored at 2-8 °C. Avoid repeated freezing and thawing. Minimize exposure to light and warmth.

**REAGENT PREPARATION**

No reconstitution is necessary. This monoclonal antibody may be used directly from the vial. Bring reagent to 20 - 25 °C prior to use.

**PROCEDURE**

Flow Cytometry: 10µL is the maximum amount of reagent required for 1 x 10<sup>6</sup> cells.

It is recommended that the customer determine the optimum amount of antibody for each application.

**STATEMENT OF WARNINGS**

1. This reagent contains 0.1% sodium azide. Sodium azide under acid conditions yields hydrazoic acid, an extremely toxic compound. Azide compounds should be flushed with running water while being discarded. These precautions are recommended to avoid deposits in metal piping in which explosive conditions can develop. If skin or eye contact occurs, wash excessively with water.
2. Never pipet by mouth.
3. Do not use antibody beyond the expiration date on the label.
4. Avoid microbial contamination of reagents or incorrect results might occur.

**OTHER CONJUGATES AVAILABLE**

- IgG - FITC (IM3033)
- IgG - PE (IM3034)
- IgG - BIOTIN (IM3035)
